

Automatic Payment Method for Off-Grid Solar Energy Storage Cabinets Used in Oil Refineries

Overview

Abstract – This paper presents a case study for a recent Company approved offshore oil and gas development project aims to install 19 platforms with off-grid photovoltaic (PV) and battery systems for economic and decarbonization purposes. SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours. It. Solar Module systems combined with advanced energy storage provide reliable, uninterrupted power for off-grid telecom cabinets. Continuous power availability ensures network uptime and service quality in remote locations, even during grid failures or low sunlight. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. The oil and gas industry is a cornerstone of the Gulf region and remains critical in global energy markets. BX Energy Systems delivers tailored battery storage solutions.
