

Distributed energy storage liquid cooling charging module

Overview

This liquid-cooled charging module supports reliable liquid cooled ultra-fast charging, extending equipment life and improving user experience in demanding environments. The project features a 2.5 MW/5MWh energy storage system with a non-walk-in design which facilitates equipment installation and maintenance, while ensuring long-term safe and reliable operation of the entire storage system. The energy storage system supports functions such as grid peak shaving. LCR100040A is a high-frequency isolated liquid-cooled AC/DC charging module with core advantages such as ultra-wide voltage range, ultra-high full load liquid cooling operating temperature, super high efficiency. Additionally, liquid cooling for high protection, zero noise, high power density is. Prostar PESS C&I series liquid cooling distributed energy storage system excels as a cutting-edge distributed energy solution. Its distributed architecture ensures high adaptability across diverse grid conditions, enhancing energy efficiency and management.
