

Egypt hospital solar system

Overview

com- The "Yalla Shams" initiative in Egypt, which aims to rely on solar energy as clean energy and as an alternative to petroleum products, managed to operate the first solar-powered children's hospital, which is located in Marsa Matrouh Governorate. The study specifically focuses on the energy efficiency and neutrality of hospitals, which are among the most important and energy-consuming sectors. This is achieved through an inductive study of the relationship between the guidelines for designing hospitals and green health facilities and the. Al Orman Association and NBK-Egypt signed a protocol to fund the fourth stage of the Luxor hospital solar project, totaling EGP 59 million by 2029. Image Source: Zawya NBK-Egypt. As part of its Corporate Social Responsibility and in support of Egypt's efforts to create a sustainable ecosystem that depends on renewable energy as one of the most important sources of energy, NBK-Egypt signed the fourth protocol with Al Orman Association to fund the fourth stage of the solar. This study presents a case study of a hospital located in the Gulf Cooperation Council (GCC) that utilizes a solar-collected water-heated system.
