

Energy storage power station comprehensive insurance

Overview

BESS require three core insurance types: property insurance covering physical assets, general liability insurance for third-party risks, and specialised technology insurance for performance guarantees. Our warranty insurance solutions help to secure your sustainable business in the long run. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As energy storage becomes integral to the transition towards renewable resources, the significance of adequate insurance coverage grows. As the global energy transition accelerates, energy storage has become a critical enabler of renewable energy deployment and grid stability. Through BESSI, NARDAC will provide the sector with comprehensive insurance services rooted in the understanding. Whether it's a gas turbine plant or a traditional coal-fired facility, your company can select from an array of Chubb power insurance products featuring large-capacity limits and specialized protection. Customarq from Chubb—our hallmark package product—features a modular format and a \$250,000*.
