

Fixed cabinet type for British chemical plant

Overview

COSHH cabinets are specially designed steel storage units that contain and isolate hazardous substances. They help minimise exposure, prevent leaks or spills, and protect substances from unauthorised personnel or ignition sources. Key Features of COSHH-Compliant Cabinets COSHH stands for Control of Substances Hazardous to Health—a set of legal requirements enforced by the UK Health & Safety Executive (HSE). Are you unsure which type of cabinet you need for your media?

Our DENIOS expert team would be happy to advise you! Looking for a larger solution?

We have solutions for larger space. A large collection of durable, reliable bundled chemical cabinets for both internal and external use. Ideal for the storage of flammables, oils, corrosives & toxics, our chemical cabinets are made-to-order and can be customised to your exact requirements, including dimensions, colour finish, and. Designed specifically to store chemicals securely, these cabinets help prevent leaks, accidents, and dangerous chemical reactions. Our bundled industrial drum and IBC Chemstor® cabinets safely store containers of liquids such as paints, thinners, solvents, oils, grease, chemicals etc and comply.

Plant Layout

General Principles
Inherent Safety
The Dow / Mond Indices
Domino Effects
Fire
Explosion
Toxic Gas Releases
Reduction of Consequences of Event on and Off Site
Positioning of Occupied Buildings
Aggregation / Trapping of Flammable Vapours
Hazard assessment of site layout is critical to ensure consequences of loss of containment and chances of escalation are minimised. Domino may be by fire, explosion (pressure wave and missiles) or toxic gas cloud causing loss of control of operations in another location. See more on [hse.gov.uk](https://www.hse.gov.uk)
