

Huawei s new york energy storage project

Overview

ALBANY — The New York State Public Service Commission (Commission) today confirmed granting the construction and operation of a battery-based energy storage facility with a capacity of up to 100 megawatts (MW) located in Astoria, Queens. The \$132 million facility will be. QUEENS, NY —Today, New York City Economic Development Corporation (NYCEDC) and the New York City Industrial Development Agency (NYCIDA) announced the advancement of a key commitment in New York City's Green Economy Action Plan to develop a clean and renewable energy system. The \$132 million facility will be built by East River ESS. They store surplus renewable energy for when it's not windy or sunny, and maintain a balance between energy supply and demand. There has been a 90 percent drop in the cost of batteries over the last 15 years as new factories have come on line, resulting in significant growth in this sector. As of January 2026, there are 51 utility-scale battery storage projects in New York, according to Cleanview's project tracker. Their total operating capacity is 271 MW. In 2025, there were 5 battery storage projects built in New York. harness next-generation battery technologies for efficiency and longevity, 3.
