

Italian lithium energy storage power supply procurement

Overview

In March 2025, Italy awarded 1.2 GW of grid-scale battery storage contracts to eight consortiums, marking the largest single procurement in EU history. This isn't just another clean energy milestone. Everyone's talking about batteries. Underpinning MACSE, or Meccanismo di Assegnazione Centralizzata per la Sostenibilità Energetica, is an ambitious plan to boost renewable energy integration and support up to 50GWh of energy storage by 2030 – a move to. The TSO of Italy has completed its first MACSE auctions for energy storage, procuring 10GWh of capacity at what the NHOA CEO called 'exceptionally competitive prices'. Transmission system operator (TSO) Terna announced the results of Italy's long-awaited energy storage-focused capacity auction. Greenvolt Group, through Greenvolt Power, was among the winners of the MACSE battery storage auction launched by Italy's grid operator Terna, securing a 15-year indexed tariff for one of its projects. The winning project is located in the MACSE South & Calabria auction zone and will be one of the. With Ministerial Decree no. 346 of 10 October 2024 (the “Macse Decree”), Italy's Ministry of the Environment and Energy Security (“MASE”) has approved the proposal for the regulation of the Electricity Storage Capacity Procurement Mechanism (“Macse”) presented by Italian electricity transmission. The Italy market for lithium battery precision structural parts within the power and energy storage sector has experienced robust growth, driven by escalating investments in renewable energy infrastructure and energy storage solutions.
