

Singapore new energy charging station

Overview

Allgreen Properties, a real estate developer based in Singapore, is setting up the country's largest public charging hub. This facility will simultaneously serve 55 EVs when it opens in mid-December. Singapore's electric vehicle (EV) charging infrastructure is expanding steadily across public HDB carparks and private premises, sustaining the momentum of our transition to cleaner energy vehicles. In the first half of 2024, new electric car registrations accounted for almost a third of all new. From locating chargers to home setups, here is your complete 2026 landscape. Reliable charging reduces range anxiety and makes EVs a realistic replacement for petrol cars, especially in a dense city like Singapore where many drivers live in flats without private driveways. The company is building the new charging hub at Great World, a mixed-use property spanning 1. This project was developed following an innovation grant awarded to Singapore renewable energy solutions provider Eigen Energy in March 2021, by the Singapore Energy Market Authority (EMA) and Shell, with. Developed in-house based on an open standard called AutoCharge, the app-free charging system is available at five locations in Singapore.
