

The community uses German-made network cabinets with both AC and DC power supply

Overview

Outdoor active fiber cabinets with the flexibility to accommodate both AC (alternating current) and DC (direct current) power sources, and rectifiers convert AC to the DC power required by most of the equipment in the shelter. These cabinets combine the benefits of active equipment, flexible power. Telecommunications and networking enclosures are available in active or passive setups. Passive refers to an enclosure, e., a fiber distribution hub, that does not have power. The Alpha enclosure product line provides a full range of rugged cabinets for any application, including secure indoor and outdoor uses. Thanks to the extensive range of accessories and the well thought-out cable concept, the customised equipment options for our network cabinets leave virtually nothing to. Whether you're looking for a robust 19" data rack for your data centre, a wall mount data cabinet for small office spaces, or an outdoor cabinet for challenging environmental conditions – we have the right solution for you. Order any rack accessories and suitable cable management equipment with.
