

Vietnam ho chi minh brand solar energy system project

Overview

BSS4VN (Balcony Solar Systems for Viet Nam) is a public-private partnership project that promotes distributed solar energy solutions for urban environments. Ho Chi Minh City, 19 June 2025—Vietnam took a major step toward deploying solar energy with the official launch of the Balcony Solar Systems for Vietnam (BSS4VN) project. The kick-off ceremony marked the start of an innovative pilot that seeks to replicate Germany's success with plug-and-play solar. GIZ and Phuc Khang Corporation has launched Vietnam's first balcony solar program in Ho Chi Minh City, targeting 100 units by April 2027. The launching ceremony for the pilot of Vietnam's first balcony solar power. BSS4VN project, supported by the German Federal Ministry for Economic Cooperation and Development (BMZ) under the develoPPP programme, implemented by GIZ and a consortium of German and Vietnamese private partners – pilots small “plug-and-play” balcony solar systems to empower urban households to. A new project promoting compact solar energy systems for households was officially launched this week in HCM City, marking a step forward in Việt Nam's transition to cleaner and more sustainable urban energy.
